JAVASCRIPT PROJECTS

- <https://github.com/josueJURE/passwordGenerator>
- <https://github.com/josueJURE/slider>
- <https://github.com/josueJURE/clock>

SKILLS

- JavaScript, CSS, HTML
- DOM
- React, currently learning it
- GitHub
- Data structures
- Linux Command Line
- Visual Studio Code
- NPM Packages

SUMMARY

I'm a **self-taught Front-End Web developer**, keen to learn and develop my skills. I've recently **built a password generator from scratch using vanilla JavaScript, CSS and HTML**. I'm **currently learning React**. As a support worker I need to be able to **communicate well with people** of different knowledge levels, understand different points of view and **collaborate well with my team** under pressure. All of which I believe is **transferable to software development**. I **regularly attend Free Code Camp and Code Bar events**. Doing so enables me to stay current and meet like minded people. I also enjoy **pair programming** with other meetup members.

SOFT SKILLS

- Teamwork: Participate in pair programming sessions during Meetups events.
- Curiosity: Participated in a Hackathon to acquire additional skills and broaden my knowledge.
- Problem-solving skills: **I use Codewars to improve my problem solving skills**. Doing so helps me exercise the parts of my brain that mull over problems and craft solutions for them. There is no doubt that **Codewars plays a key role in my understanding of problem solving through programming**.
- Adaptability: Stay abreast of the latest trends and advancements through regular podcast listening, ensuring my skills and knowledge remain current and adaptable.

EDUCATION

2023

Programming Languages : Web Development
Udemy - Online Learning

2016

Certificate of Higher Education : Mathematical Studies
Birkbeck, University of London - London, ENG

2015

GCSE: Maths
City Lit - London
