Professional Summary

I am a self-taught Web Developer, with a background in hospitality and the charity industry, keen to learn and develop my skills. I have recently built a **full stack ChatGPT AI generator application** and I am currently working on adding the **GPT-4 vision API to it**. I completed a **bootcamp with Founders and Coders** in January 2024 to learn more about web development.

Key Skills

- JavaScript
- HTML
- CSS
- GitHub
- Node.js
- Express
- Integration of OpenAI API to full stack apps
- Azure

Professional Experience

- [AI recipe generator](#): The app uses open AI APIs, to generate a recipe based on the user preferences. This allows for the returned recipe to display something informative (the text) alongside a visual component (the AI generated image). One of the issues I encountered was that the AI image generation took much longer than the recipe text to load. Upon reading the **Open AI documentation** I found a solution that allowed the recipe text to display in real time (mimicking the effect seen in **ChatGPT**) while the image continued to load. This resulted in a much smoother user experience by cutting down on wait time.
- [Calculator](#): A project that uses **JavaScript, HTML5, and CSS**, along with **local storage**. With the knowledge and skills I gained while building this project, I am now able to create **fully responsive applications** using **CSS grid**. I also had to do a lot of **debugging**, both of which are valuable skills in the tech industry.

Support Worker

April 2020 - Present

Learning Disability Network (LDN), London

- **Plan shifts** to ensure the workload is shared equally among team members .
- **Provide thorough handovers** to ensure that work runs smoothly.
- Help adults with learning disabilities live a meaningful life.

Purchasing Administrator

August 2010 - June 2018

Danubius Hotel Regent's Park

- **Generated a 15% saving** by negotiating with suppliers.
- **Trained purchasing assistants on how to use software invoice processing** and other areas of the department.

Education

[Founders and Coders](#)

Oct 2023 - Jan 2024

12-week full stack bootcamp

Full stack web development skills and AI integration

Birkbeck University of London

Oct 2014 - Jun 2016

Certificate of Higher Education in Mathematical Studies

Calculus 1 and Calculus 2

City Lit, London

Oct 2013 - May 2014

Maths GCSE, B grade

Professional Certificates and Qualifications

Udemy

Jan 2022 - Dec 2023

[JavaScript Developer Bootcamp - Beginner to Expert](#)

LDN

[Safeguarding Adults and Children at Risk](#)

Apr 2024

Volunteering

[Codebar](#)

February 2024 - Present

- Codebar is a charity that facilitates the growth of a diverse tech community. I help run free regular workshops for minority groups in tech.
